Visionboard AI Mindmap Module

Automatic Life Vision Generation Based on 7 Pillars

■ Purpose

To automatically generate a visual life vision board (mindmap-style) based on user answers to a deep quest
It categorizes responses using the 7 Pillars of Life and transforms them into structured goals and milestones

■ Mindmap Structure

- Life Vision sits at the center.
- 7 main branches (Pillars): Health, Wealth, Love, Legacy, Wisdom, Spirit, Character.
- Each pillar contains a single life goal, AI-generated.
- Each goal contains 3–5 auto-generated milestones.
- Each node is editable and visually color-coded.

■■ Backend AI Logic

Input: Structured answers from the Vision Questionnaire.
Process:
- Interpret values and desires.
- Generate 1 goal per pillar.
- Break each goal into 3–5 progressive milestones.

Output: JSON format (pillar → goal → milestones).

■■ Frontend Visualization

- Drag-and-drop interactive mindmap.
- Expand/collapse branches.
- Color-coded by pillar.
- Export options: PNG or PDF.
- Built with React Flow / GoJS / XMind SDK.

■ Controls & Extensibility

- Regenerate button for each goal/milestone.
- Manual editing.
- Save versions and export.
- AI-agnostic structure (OpenAI now, local LLM later).
